01 Overview

This document shows, in plain terms, how your investment is used to build your online store — what each part covers, and what it costs to run once it is live.

IN SHORT

To build: GHS 20,000 for the complete store described in your Project Scope. **To run online:** a small monthly cost in US dollars — low to start, around \$7, and growing only as your store does. **Support:** your first month is free, then a small, predictable fee. **Each sale:** the payment provider takes a small 1.95% — not us.

The rest of this document breaks each of these down, simply.

02 How your investment is used

Your store is built from a few major parts that work together. Here is how the GHS 20,000 is shared across them.

These are not separate products you switch on and off — together they make one working store. The amounts simply show where the work goes.

WHAT IT BUILDS	INVESTMENT
The storefront and your brand pages Your Home, About Us, and Contact Us pages, the store, the collections and design pages, and the fully custom look made for the Eight Two Five brand.	GHS 4,500
Ordering, payments, and accounts Size bands and charts, the custom-order flow, online checkout with mobile money and cards, payment links, automatic booking, and each customer's simple account and order tracking.	GHS 5,000
The custom-measurement and home-visit booking The three ways a customer can be measured, the booking calendar, the GHS 500 deposit handling, and managing visits.	GHS 5,000
Your control dashboard The private place to manage designs, collections, notes, prices, delivery rates, orders, the calendar, the deposit, retiring and bringing back designs, and your store analytics.	GHS 3,500

WHAT IT BUILDS	INVESTMENT
----------------	------------

Testing, launch, and handover	GHS 2,000
Careful testing on phones and computers, loading your content, going live, and handing everything over working and ready.	

Total to build **GHS 20,000**

Every part is custom-built for Eight Two Five — not a ready-made template — and the finished store is yours.

03 Running the store after launch

Once your store is live, there are a few ongoing costs to keep it running. Here they are in plain terms — what each is for, and what to expect — in three parts.

Keeping your store online

Your store runs on trusted international services — the kind that keep it fast, secure, and available around the clock. Because these are foreign services, they are billed in US dollars, so the amounts here are in dollars; the cedi equivalent can move a little with the exchange rate.

At the beginning the cost is low — about \$7 a month — because there is little traffic and not much data yet. As more customers visit and your collections and orders grow, it rises gradually toward about \$15 a month. If the store takes off very quickly, a busy month could go a little above that. Either way, there are no surprises: every month we send you a clear report of exactly what was used and what to pay.

Your web address is separate and small — \$15, billed once a year. The emails your store sends (order confirmations and updates) are covered at your expected volume (3000 emails/month); only if the store grows enough to send far more (than 3000 emails per month) would a small extra apply, which we do not expect in your first year.

Across a full year, this comes to roughly \$99 at the start, rising toward about \$195 as the store grows — in cedis, about GHS 1,170 to GHS 2,300. You only move toward the higher end as your store gets busier, which is a good sign.

Note: these services are billed in US dollars, so the cedi amounts are approximate and shift with the current exchange rate. Your monthly report shows the exact amount each time.

KEEPING YOUR STORE ONLINE	PER MONTH	PER YEAR
At the start (light traffic)	~ \$7	~ \$99

KEEPING YOUR STORE ONLINE	PER MONTH	PER YEAR
As your store grows	up to ~ \$15	up to ~ \$195

Maintenance and support, from us

This is what you pay XCreativs to look after the store — keeping it updated and secure, taking backups, fixing any issues, making small tweaks, and being available when you need help. Your first month is free. After that, it is GHS 3,600 a year, which we can split into GHS 300 a month if you prefer.

The payment provider's fee, on each sale (Using Paystack)

When a customer pays, the payment provider (Paystack) takes 1.95% of that payment and passes you the rest, automatically. On a GHS 500 order, for example, that is about GHS 9.75, and you receive GHS 490.25 the next working day. This is charged on each sale by the provider — not by us — and it has no setup or monthly fees.

04 In summary

To bring it all together:

- **GHS 20,000** builds your complete store, custom-built for your brand and fully yours.
- Keeping it online costs a small amount each month in US dollars — about \$7 to start, rising toward roughly \$15 as your store grows — plus \$15 a year for your web address.
- Your first month of maintenance and support is free; after that it is GHS 3,600 a year (or GHS 300 a month).
- On each sale, the payment provider takes 1.95% — charged by them, not by us. Every month, we send you a clear report of the services used and the exact amount to pay.

We have kept this lean and honest, with no hidden costs. We would be glad to walk through any part of it with you, and to begin as soon as you are ready.
